COMMISSION ON NARCOTIC DRUGS
Tenth special session
Vienna, Austria, 8-19 February 1988

DATA ON THE ILLICIT TRAFFIC IN NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES DURING 1986

Note by the Secretary-General

1. The present document is based on data extracted from the new annual reports questionnaires (E/NR/1986) received up to 22 January 1988. In addition to the drug seizure data reported in previous years, this document now contains chapters on illicit cultivation, illicit manufacture and diversion from licit channels. Comments on the usefulness of this new presentation and any suggestions for its improvement would be welcome.

2. Figures shown in the statistical tables on quantities seized in Chapter II are those officially communicated by Governments in their annual reports on the working of the international drug control treaties submitted to the Secretary-General. Where these have not been supplied, the following other official sources of information have been used:

(i) figures followed by /1 have been cited by the International Criminal Police Organization;

(ii) figures followed by /2 are obtained from one or more seizure reports provided by Governments or from other official sources;

(iii) figures followed by /3 have been supplied by the International Narcotics Control Board.

3. In view of the problems posed by vague or incomplete reporting, the figures cannot invariably be taken as entirely reliable statistical information. Also, annual seizure figures from previous years are subject to up-dating.

4. The graphic presentations on quantities reported seized worldwide in Chapter III are based on the regional and global totals contained in Chapter II together with data from previous years.

5. The data contained in Chapter IV on "Illicit Cultivation" is extracted from Form 5 of the annual reports questionnaire. Some countries indicated illicit cultivation without filling in the corresponding Form 5. In those cases, only the country name is listed in the table without any additional data. Certain countries do not give an estimate of the total area of illicit cultivation and/or the total quantity grown annually, but instead give figures on the actual quantities seized and the area involved. Whenever a country has

V.88-20812

expressly reported in that fashion, the figures are marked with an asterisk. In some instances, it is not clear whether a country is giving an estimate of the total weight of plants or an estimate of the weight of the substance (opium, cannabis resin, etc.) which could be obtained from those plants. The same problem arises with the last column concerning the estimated percentage going into the international traffic: it is not always clear whether the percentage indicated relates to plants or substances derived therefrom.

6. The remarks listed under the column "Estimated Area of Illicit Cultivation" in Chapter IV are defined as follows:

Minimal - either used by the reporting Government itself without further details, or refers to illicit cultivation of small scale or negligible extent (less than 0.1 ha), such as single plants grown in flower pots, in private backyards, etc.

Wild growth - refers to plants growing spontaneously in certain areas of some countries and which are liable to illicit harvesting.

7. Chapter V on "Illicit Manufacture" is based on data from Form 6 of the annual reports questionnaire. Some countries indicated the existence of illicit manufacture without filling in Form 6. In those cases, only the name of the country and the specified substances appear in the table.

8. Chapter VI on "Diversion from Licit Channels" contains data from Form 7 of the annual reports questionnaire. Some countries reported diversion without completing Form 7, and sometimes without even specifying the substances involved. Several countries gave only summarized information on all substances diverted. A few substances reported by Governments to have been diverted are not, in fact, under international control.

9. The remark "small quantity", which appears both in Chapter V and Chapter VI, is either used by the Government itself (and also covers similar indications such as "traces","negligible amounts","for personal use only", etc.) or refers to quantities of less than one gramme.

10. The statistical tables are based on data provided by States both Parties and non-Parties to the relevant international treaties on the control of narcotic drugs and psychotropic substances. The designations employed and the presentation of material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or any authority, or concerning the delimitation of any frontiers or boundaries.

11. Abbreviations used in the statistical tables, which are not explained in footnotes to the tables themselves, are as follows:

kg = kilogramme (e.g. 20.600 kg = 20 kilogrammes and 600 grammes)
lt = litre (e.g. 1.500 lt = 1 litre and 500 millilitres)
u. = unit (e.g. 10,600 u. = 10,600 doses, tablets, ampoules, plants, bushes, or other appropriate units)
ha = hectares
